Wings for Butterfly (x2)

Butterfly wing consists of upper and lower part which are united in one.

♥ Lower wing part (detail №1):

4 round: (2 sc, inc) * 6 (24)

15 round: (8 sc, dec) * 2 (18)

In the next round we will connect both details.
Do not cut the working thread.

16 round: holding the detail №2 on the hook, insert it into 1st sc of the last round of the detail №1 and crochet sc. Then crochet along the detail №1: 5 sc, dec, 8 sc, then crochet along the №2: 7 sc, dec, 9 sc (32)

Thus, we connected the parts of wing and continue crochet in spiral.
In case there is a space in the corner between details
sew it with a tail we leaved with detail №1.

17 round: 5 sc, dec, 14 sc, dec, 9 sc (30)

18 round: 4 sc, dec, 13 sc, dec, 9 sc (28)

Crochet additional 6 sc to make the
round finish at the bottom of the wing.
Fold the piece edges in half and crochet
14 sc through both sides.
Pull and cut the thread leaving a long tail
for sewing.

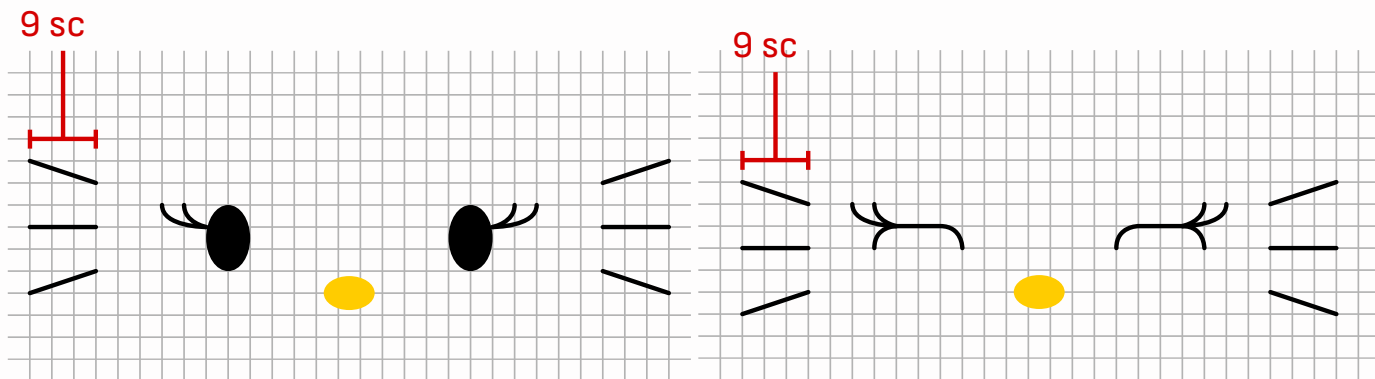

Assembly and finishing

1. Attach the head to the body. Match the last round of the body with the 27th round of the head (which we previously marked), fix the details with pins. Make sure that the position of the head is straight (orient along the chain with which we started crocheting the head, it should be parallel to the body). Start sewing on the details hooking single crochets of each piece. Add stuffing between the neck and the head while sewing.
2. Fix the ears of the level of 2-10 round of the head and sew on.
3. Glue or embroider a nose in the center of a face between 9 and 10 round counting from the bottom of a head. Then embroider or glue eyes (it is more convenient to embroider lashes before eyes are glued). After that embroider whiskers with black thread – 3 stripes on each side.

For placing of all the elements of the face be guided by the diagrams. You can correct the position according to your crochet density.

4. Attach the arms to the body using the thread fastening. We will need a long needle and strong cotton thread folded in double (white color is better, dark thread is used for clarity).

Insert a needle in any point on a back and pull it out on the side of the body between the 17th and 18th rounds, leave a tail of medium length on a back. Then pull a needle from inner side of the arm to outer (1). Next insert a needle in the same point from where the thread comes (2), and pull out from the inner side of the arm but at the distance of 2 sc from the first hole (3). After that insert a needle in the same point at the side of the body from where the thread comes (4), and pull out symmetrically on the other side of the body (5). Fasten the second arm in the same way. For reliable fastening, you can repeat the actions. After the both arms are fixed, pull the thread into a back, tie the ends tightly in a knot and hide them inside the detail.

5. Sew the antennae to the top of the head.
6. Sew the flowers under one of the ears, leave the petals free. You can additionally decorate the middles with beads.

7. Fix the legs at the level of 3-7 rounds of the body with a distance of 9 stitches apart. The position of the legs may vary slightly, choose it so that the toy sits confidently. Sew on the legs, try to keep their round outline.

8. Sew the wings to the back of the toy. They can be positioned raised or folded. If the wings dangle a lot, fix them with additional stitches.
9. Fix the tail at the level of 5-8 rounds of the body and sew on. The tail will also be an additional support for toy while sitting.
